

VapurClean[™] Advantage

The evolution of green cleaning and disinfection

Maid Brigade[®]
YOUR HOME. CLEANER.

The GREENEST cleaning just turned BLUE

Introducing Maid Brigade's exclusive VapurClean Advantage[™].... powerful cleaning and disinfection of all your home's surfaces using the safest cleaning process for your family. VapurClean[™] deep cleans and disinfects kitchens, bathrooms, counters, floors, upholstery and every other surface in your home using only **water**.

No chemicals are used in this exciting new technology so your family can enjoy a truly clean and safe environment, free from the hidden health risks associated with traditional cleaning products.

Our revolutionary VapurClean[™] system creates a dry **steam** vapor which penetrates microscopic pores in surfaces where dirt and germs hide and multiply. VapurClean[™] kills dust mites on contact, removes allergens, kills bacteria and removes mold and mildew. Conventional, topical cleaners can't reach beneath the surface to remove embedded dirt or kill bacteria and germs. VapurClean Advantage[™] includes the patent-pending TANCS[®] technology (Thermo Accelerated Nano Crystal Sanitation), a science which qualifies the equipment behind VapurClean[™] as a disinfection device according to the US EPA.*

Because the process is so effective, you'll see **long-lasting results** between cleanings. With VapurClean[™] your family will enjoy a clean home that remains germ-free longer.

Babies, children, pets, the elderly and others with compromised immune systems are particularly vulnerable to these germs as well as the harsh cleaning chemicals traditionally used to fight them. But only our VapurClean[™] system eliminates the germs *and* the toxic chemicals to help keep your family **safe and healthy**.

Call today to ask about these **SPECIAL** VapurClean Advantage[™] services:
